Harsh Nagpal

Founding Product Designer · Consumer apps · Designs and builds with AI

Delhi NCR · +91 85109 94412 · harshnagpal0@gmail.com · LinkedIn · Portfolio

Product designer with 3+ years designing consumer apps end to end, from problem framing and user flows to UI, design systems and build QA. Experienced in building working prototypes and live web products with AI.

EXPERIENCE

Founding Product Designer · Misfits
Nov 2023 – Present · Gurgaon

Community platform for offline meetups and clubs · Shark Tank India Season 5 · Android · iOS

- Led design as the sole product designer for every member-facing and leader-facing experience on a platform with **160K+ downloads**, working closely with the founders, engineers and ops from scoping to release.
- Created the Misfits design system from scratch, used across both the member and leader apps.
- Redesigned discovery so members browse meetups first instead of joining a club first, which cut booking from four steps to two and led to **34% more bookings per person**.
- Turned club creation into a guided, AI-assisted, self-serve flow, which cut the median time to create a club from 2–3 days with ops to **28 minutes**.
- Introduced a Friends feature that lets members add only the people they have met at a meetup, and **38% of attendees made at least one friend**.
- Built a waitlist for cities Misfits had not launched in, where **80% of people who reached the screen added their name**.
- Scoped and designed spot booking and payments, including cancellations, replacements and attendance, across **11K+ meetups**, along with Leader Mode, the host tool used by **200+ active leaders**.
- Redesigned in-app chat around how groups talk in person, with adjustable message volume and photos shared as polaroids, and built a working code prototype with Claude that is now in development.
- Designed and launched the Misfits marketing website in Framer.

UI/UX Designer · Hestabit
Apr – Oct 2023 · Noida

- Designed mobile and web UI for client products, taking the RV Sidekick app from wireframes to final UI in a one-week sprint and building a three-portal brand management system for Jägermeister.

UI/UX Design Intern · Graphhene Software
Jan – Mar 2023 · Noida

Operations Associate · Retail
2018 – 2021

PROJECTS

Letters · Personal project
2026 · Live

- Took a letter-writing web app from idea to live launch solo, owning product, gesture-based interaction design, art direction and motion. Built and shipped it with Claude, including end-to-end encryption.
